Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6,8,10-15,18-21 and 24-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuramoto (6816120).

Regarding Claims 1-6,8,10-15,18-21 and 24-27, Kuramoto shows in Fig. 2, an accessory 10 and method for increasing range and for use with an existing antenna system 20 with a support 10 coupled to a wireless device and having conductive material 12, curved and straight (Figures 7 and 11) disposed on the support 10 all arranged for the purpose recited. The device is deemed to be clipped or bracketed to the existing antenna.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7,9,16,17,22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuramoto (6816120) in view of Johnson (6208300).

Regarding Claims 7,9,16,17,22 and 23, no director clipped to the support is taught in the primary reference device. Thus, Johnson is cited as resolving the level of ordinary skill in the antenna art and as evidence of obviousness and shows a director element 30 clipped, via 32, to the existing antenna 26 of a communication device 10. It would have been obvious to the skilled artisan to employ such a director along with the reflector in Kuramoto for the purpose of providing further gain to the system. The arrangement shown is coupled to a vertical surface as recited. Additionally, a skilled artisan would have found it obvious to provide any support for antennas to be connected to any surface mounting.

5. The patent to Ogawa et al. (5539419) is cited as of interest showing a parasitic element connected to an existing antenna arrangement.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun O. Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
